Abstract (en)
A navigation system comprises a route selecting device (7) for selecting a scheduled route (SL) along which a mobile body is scheduled to move towards a destination (DN); and a display device (8) for displaying the scheduled arrival time T_o of the mobile body while the body moves along the scheduled route (SL); and is characterised by; an acquiring device (4) for acquiring traffic congestion information about traffic congestion along said scheduled route (SL), a searching device (6) for searching for a different route (CL) while said mobile body is moving along said scheduled route (SL) said different route avoiding traffic congestion informed to the acquiring device (4), and in that the display device (6) is configured to display simultaneously for a given point P; the scheduled time T_o of arrival at the destination (DN) taking the scheduled route (SL) and the difference in time T between the scheduled time T_o of arrival at the destination (DN) taking the scheduled route (SL) and the scheduled time T_g of arrival at the destination (DN) taking the different route (CL) in the case where T_g is less than T_o .
