Abstract (en)

Transducer assembly, in particular for a ship mast, including: a base (19), one or several transducers (21,22,23,24) adapted for emitting and/or receiving electromagnetic waves to/from a distant unit, a barrier forming element (4) masking emissions and/or receptions of electromagnetic waves in a relative azimuth angle of masking, a mobile support (3;30) which bears the transducer (21,22,23,24) and which is movably mounted relative to the base along a generally circular path of movement around the mast, an actuating system for moving said mobile support (3;30) along said path of movement.
