Abstract (en)
[origin: WO2009109250A1] The invention is based on a machine tool monitoring device with a detecting unit (24) for detecting a use situation (66, 80) in a machine tool (10), wherein the detecting unit (24) makes it possible to determine the position and/or speed of human or animal tissue. It is proposed that the machine tool monitoring device has at least one ultra wide band radar sensor (26, 28, 30). Furthermore, the invention relates to a machine tool with such a machine tool monitoring device.
