Abstract (en)

[origin: WO2009115459A1] A hand-held machine tool (1) comprises a protective cover (10) which is releasably connected to a supporting part of the hand-held machine tool. A radially inward-extending clamping projection (13) is formed on the opening wall (12) that delimits a receiving opening (11) of the protective cover. A supporting part on which the protective cover is mounted has a supporting connection piece (17) that can be inserted into the receiving opening. A clamping recess (19) for the clamping projection is introduced into the supporting connection piece.
