Abstract (en)
[origin: WO2009124528A1] The invention relates to an installation (1) for producing moulded bricks (4), comprising a centering device (23). The installation (1) comprises at least one approximately horizontal waterline plane (29) in which the die plate (20) and/or the mould cavity (25) can be displaced relative to a machine frame (5) of the installation (1), wherein the displacement can be controlled by the centering device (23).
