Abstract (en)
[origin: WO2009124519A1] The invention relates to a vehicle restraint system for delimiting roadways, comprising guide beams (1) that are detachably placed next to each other. Each guide beam (1) comprises a housing-like base body (3) that can be arranged on the ground and a guide bar (2) disposed above the base body (3). Each base body (3) comprises a spring (9) at a top (8). Each guide bar (2) at a bottom (7) has a groove (17), wherein said groove (17) during coupling engages in the spring (9) of a base body (3), thereby creating a positive tongue-and-groove connection (60) between the guide bar (2) and base body (3).
