Abstract (en)
[origin: CA2719120A1] The invention relates to an explosive material container (1) for a block of explosive material (7), in particular comprising a protective film (8), in which an inflow protection element in the form of a cover (2) with integrated protection, support, guiding and/or positioning functions is integrated. Said inflow protection cover (2) is, preferably, provided with sealing and/or adhesive material and is placed on two or more edge profiles (3, 4, 5, 6) of the explosive material container (1), on the firing side, on the explosive material block (7) packed in the protective film (8). Positioning tips (9, 9.1) of the inflow protection cover (2) and the explosive material container (1) assume the positioning function.
