Abstract (en)

[origin: EP2263796A1] The container (1) has reference solution (2) contained in it for clinical chemistry, where the container has an outlet covered by a closure part (3). The reference solution is removed by puncture with a piercing element. A wick (4) soaked with reference solution is arranged in the container, which extends from the outlet inside an interior of the container, in which it is arranged with the large part of its length. Independent claims are also included for the following: (1) a system with a control unit; and (2) a method for receiving reference solution for the clinical chemistry.
