Abstract (en)
[origin: EP2264257A2] The structure has a concrete connection adapter (7) arranged between concrete components and wooden parts i.e. wooden profiles (2,3), where the concrete components are arranged to one side of the structure. The connection adapter is in the form of a plastic molded part or metallic part and exhibits length in the range of 120 to 240 mm, and thickness in the range of 10 to 50 mm. The connection adapter is in the shape of cylinder cone, sphere or ellipse. The connection adapter includes a bearing surface in a concrete region in the form of a plate.
