Abstract (en)
[origin: EP2264267A2] The lock (10) has a pressure nut (18) split into two nut halves and pivotably mounted in a lock housing (14), where the nut halves are operable from a respective side of the lock. A middle part nut (20) is engaged at a tail (24) of a latch bolt (12). The nut halves and the nut are provided with receiving openings for receiving a clutch part. The clutch part is coupled with the nut (20) and one of the nut halves by being shifted within the receiving openings. The clutch part, the nut halves and/or the nut (20) have a securing unit to secure a current position of the clutch part.
