Abstract (en)  
[origin: EP2264271A2] The assembly has a door element (2) rotatably arranged in an opening of a frame element (1). An outer edge of the door element rests against an inner edge of the frame element in a closed condition, where the edges are made of glass. An outer contact surface is formed at the outer edge, and an inner contact surface is formed at the inner edge. The outer contact surface rests against the inner contact surface in the closed condition, where the outer and inner contact surfaces are made of glass. A door closing unit is arranged for prestressing the door element in the closed condition.
