Abstract (en)
[origin: EP2264363A1] The lamp (2) has a carrier rail (6), a carrier plate (7) and a flow guiding profile (16), which is a separate component with respect to the carrier rail and is arranged in the carrier rail. The flow guiding profile has multiple bar sections running parallel to each other. The flow guiding profile is provided with an end cap at one of its longitudinal ends, which is a separate component relative to the flow guide profile. An independent claim is also included for a light-band with two lamps arranged in its longitudinal direction.
