Abstract (en)

[origin: US2011126344A1] The present invention relates to a pair of knitted socks or stockings which can be removably connected to one another, in which a first attachment part is firmly attached to one of the two socks or stockings in order to receive a second complementary attachment part in a removable manner, said attachment part being firmly connected to the other of the two socks or stockings, wherein the knitted fabric of the socks or stockings has a stitch density of at least 2000 SD at least in the attachment region of the respective attachment part and is knitted using a reinforcing thread which is not visible from the outside of the socks or stockings and has a tear resistance which corresponds to at least the average tear resistance of the tear resistances of the ground thread, the plating thread and the reinforcing thread of the knitted fabric, none of the threads having a tear resistance of <10 cN/tex.
