Abstract (en)
[origin: WO2009112552A1] A lid assembly for a cup or other suitable container, said lid assembly comprising a cup-like portion comprising a cylindrical portion having an upper free edge and attachment means which are suitable for sealably connecting said cup-like portion of the lid assembly to a cup or other container. The lid assembly further comprises a lid element arranged inside said cylindrical portion and underneath the free edge of said cylindrical portion, said lid element being arranged in said cylindrical portion such that it is pivotable about at least one axis which is perpendicular to the centre axis of the cylindrical portion and a mass element connected to the lid element and arranged underneath said pivot point of said lid element, said mass element and said lid element being arranged such that when said lid assembly is tilted in a first direction away from the vertical axis, the lid element will pivot in an opposite direction.
