Abstract (en)
[origin: WO2009129639A1] The invention relates to a carriage comprising a rail (23) having a first end and a second end, and a fixing means (24) extending between said ends. The fixing means (24) is used to detachably fix a curtain (4) to the rail (23). The rail (23) is movably mounted on slides (26) in a channel (13) of the profiled element (2) for the curtain. The rail (23) is highly flexible such that it bends elastically accordingly in a curved section (2a, 2a'', 2b'') when the carriage is displaced (5).
