Abstract (en)

[origin: WO2009122021A1] The invention relates to a blender device comprising: a rotor (2) designed to engage with motor means (4) in order to be rotated; and an annular ring (5) enclosing the rotor (2) and having at least one axial orifice and a plurality of radial orifices (6) for the passage of the blend; and an admission duct (7) for admitting particles intended to be incorporated into the blend, leading into the interior of said annular ring (5). The invention also relates to a blender assembly equipped with such a device and a process for producing an emulsion.
