Abstract (en)

[origin: WO2009115268A1] The invention relates to a tool (1) having a feed motion and/or torque transmitting device having a mounting element (3) for receiving an anchor, threaded bolt, shear connector, or threaded bolt with anchor, said tool being secured in a sleeve (10) by means of the mounting element (3). The feed motion and/or torque transmitting device has a ram (9) that can be adjusted in the axial direction opposite the mounting element (3), and can be brought into contact abruptly against the anchor, threaded bolt, or shear connector.
