Abstract (en)

[origin: WO2009136026A1] A self-contained portable electrical appliance (10) comprising: - an electrical unit (12); - an electric power pack (14); the unit (12) comprising a handgrip (28) which extends in a handgrip direction Y-Y, the handgrip (28) removably connecting the unit (12) and the pack (14) in a coupled position, the handgrip (28) and the pack (14) comprising a first locking means (36) and a second locking means which are designed to lock together in the coupled position, the first locking means (36) being able to move between a rest position and an unlocked position. According to the invention, the first locking means (36) is able to move in terms of rotation between its locked and released position about an axis of rotation substantially parallel to the handgrip direction Y-Y.
