Abstract (en)
[origin: WO2009113118A1] A piece of furniture (1) comprises a main support structure (3) comprising a through opening (2) formed by said main support structure (3) and intended to be open and closed; a closure member (5) which is mobile between a closure position, wherein the closure member (5) occludes said through opening (2), and an opening position, wherein the closure member (5) leaves said through opening (2) at least partially open; means (6) for the movement of the closure member (5) between said opening and closure positions, wherein said movement means (6) comprise elastic means (7) shaped so that, when the closure member (5) is in the opening position thereof, the elastic means (7) have a starting preload adapted to urge the closure member (5) towards the closure position thereof, and when the closure member (5) is in the closure position thereof, the elastic means (7) maintain a residual preload lower than the starting preload and adapted to statically maintain the closure member (5) in said closure position thereof.
