Abstract (en)  
[origin: WO2009127594A2] The invention relates to a power distributor unit (1) comprising a plurality of vertical bus bars (28), at least two electrical withdrawable units (6, 7) arranged adjacently in a withdrawable compartment (2) and embodied as small drawers, and at least one distribution module (18) which is fixed to the withdrawable compartment and comprises electrical conductors for connecting the vertical bus bars (28) to the at least two adjacently arranged withdrawable units (6; 7) and at least one passage for contacting the electrical conductor. In order to render the power distributor unit (1) even safer, the distribution module is provided with at least one mobile protective plate such that the at least one passage is closed by the protective plate when the protective plate is in its closed position, and released by the protective plate when the protective plate is in its open position.
