Abstract (en)

[origin: EP2266436A1] The device has a locking device and an ejecting mechanism comprising drivers (7, 10) that are adjustably mounted at a guide housing (5). The driver in the ejecting mechanism is fixable in an opening position and a closing position. The ejecting mechanism has a latch mechanism with a cam and a control member that is adjustable along the cam. The control member is coupled with the respective driver to fix the driver against the force of an energy accumulator in the closing position. The closing position of the driver is adjustably provided in a shifting direction of a thrust element (1).
