Abstract (en)

The watercraft has a body shell, where a part of the body shell is formed from a composite material i.e. plastic, that is reinforced with fibers (17) i.e. carbon fibers. The fibers are formed as electric heating elements, and are formed for feeding with direct current (DC). The fibers of an outer side (18) of the shell are arranged closer than an inner side of the shell. A protective layer (40) is provided between the outer side of the shell and the fibers that are arranged in a deck area of the shell.

Abstract (de)

Bei dem Wasserfahrzeug ist mindestens ein Teil der Außenhaut (15) aus einem faserverstärkten Verbundstoff gebildet und zumindest eine Faser (17) als elektrisches Heizelement ausgebildet oder bildet einen Teil eines solchen.
