Abstract (en)
[origin: EP2266884A1] The apparatus for transportation (A) according to the present invention is provided for the carriage of the panels of display devices. The said apparatus (A) comprises one vertical foot (1) on each corner thereof; foot connection profiles (3) connecting the said feet (1); support profiles (4) connecting the foot connection profiles (3) to each other. The said apparatus (A) also comprises a pair of side frames (10,11) that can be folded inwardly towards each other; at least one lower slot (6) which is located on the two opposing side frames (10) and in which panels are placed; upper slots (8) in a corresponding number with each lower slot, which can be turned on the frame and on which the upper parts of the panels rest in such a manner that it is located on the other two opposing side frames (10) so as to be on the upper part of lower slots (6).
