Abstract (en)
[origin: EP2266893A1] A storage container (1) according to an aspect of the invention is provided with a tube-shaped storing portion (2) formed of a resin having an extraction opening (2a) enabling a stored substance to be sucked in a center area on one end side, and a circular opening on the other end side, and a bag-shaped storing portion (3) which is welded along the circular opening of the tube-shaped storing portion (2), enters inside the tube-shaped storing portion (2) to be able to come into intimate contact with an inner surface of the tube-shaped storing portion (2) in sucking through the extraction opening (2a), and is formed of a thin film in the shape of a bag to be a non-independent body, where the tube-shaped storing portion (2) changes in cross-sectional shape from a circular shape to an elliptical shape toward one end side from the other end side.
