Abstract (en)
The Inventor provides a process for the treatment of an effluent stream comprising: (i) passing the effluent stream into an activated sludge basin; (ii) removing at least a portion of activated sludge from the activated sludge basin; (iii) pressurising at least a portion of the removed activated sludge in the presence of a gas to form pressurised activated sludge; (iv) flash depressurising the pressurised activated sludge to form depressurised sludge; and (v) returning at least a portion of the depressurised sludge to the activated sludge basin.
