Abstract (en)
The invention relates to a composite yarn fabric including an untwisted cotton mass, comprising a group of warp yarns which intersect a group of weft yarns perpendicularly. The invention is characterized in that it includes masses of untwisted cotton fibrils (3) solidly connected to at least one of the yarn groups, such that said masses of cotton fibrils (3) have a larger volume than the yarns to which they are solidly connected in the longitudinal direction of the respective yarns.
