Abstract (en)

[origin: EP2267383A2] The refrigerator has a body (1) and a door (2), which encloses a storage space (3, 4) with the body. A machine aggregate (7) is suspended below the body such that a recess (8) is formed at a lower side of a base (6) of the body, where the machine aggregate is engaged in the recess. A base area of the recess is covered with a base area of the machine aggregate. The recess exhibits a maximum height above a compressor (5) accommodated in the machine aggregate. Front edge of the base exhibits larger thickness than a cover (13) of the body.
