Abstract (en)

The security element has a carrier substrate comprised of a lacquer layer. A layer with optical, optically active, diffractive, electrically conductive and/or magnetic characteristics is arranged between the substrate and a reflective layer or a layer with high refractive index. An adhesive agent layer is arranged between a colored or pigmented partial separating lacquer layer and a complete adhesive coating i.e. hot- or cold sealing adhesive coating or self adhesive coating. The separating lacquer layer is applied in form of figure, symbol, letter, character string, logo, line or guilloche.
