Abstract (en)
[origin: WO2009127467A2] A drawer (14) has two lateral frames (11), a front panel (10), which is fixed on the lateral frames, a rear wall (15), and a drawer floor (18), wherein attachments (16, 19), which are placed on said lateral frames (11) and said rear wall (15), are provided, said attachments being fixed using pocket-shaped mounts (12, 17) on the sides of said front panel (10) and said rear wall (15) facing toward one another. The pocket-shaped mounts (12, 17) are open on the top sides facing away from the drawer floor (18). The upper faces of the attachments (16, 19) align with the upper faces of the pocket-shaped mounts (12, 17). Furthermore, the pocket-shaped mounts (12, 17) are formed on the bottom side facing toward the drawer floor (18), said mounts being contoured such that they can be displaced and/or locked. The drawer can thus be assembled easily.
