Abstract (en)

[origin: WO2009125447A2] The aim of present invention is to provide a procedure, a technique and a product able to induce the hair regrowth in the bald patches which have formed because of alopecia. Such a technique, does not have the disadvantages of the classic hair transplant. A further aim of the invention is that of providing a method with which it is possible to have new growth of hair on the bald patches on humans the use of the product. Furthermore, the aim is to provide a relatively simple method of application. The above aims can be reached by using the method based on the invention so that the hair grows again naturally. The invention, therefore, refers to the regrowth of hair, in alopecia.
