Abstract (en)
[origin: WO2009130014A1] The invention relates to a structural part (21), especially for the back rest of a vehicle seat, and a vehicle seat, especially the rear bench seat of a vehicle. Said structural part comprises at least one plate element (30) and a reinforcing frame (40) comprising at least one first profiled element (41) and a second profiled element (42). A reinforcing element (50) is provided at least partially inside the plane of the reinforcing frame, said reinforcing element being connected only to the first profiled element and to the plate element.
