Abstract (en)

[origin: WO2009130047A1] The invention relates to a device for producing starting materials, combustible substances and fuels from organic substances. Said claimed device comprises a reactor (10) that comprises an introduction device (11) for the organic substances, an evacuation device (12) for the reaction products and a device (13) for feeding reaction energy for the transformation of organic substances into reaction products. The invention is characterised in that the introduction device (11) comprises pneumatic means (24) for the supply of solid material.
