Abstract (en)

[origin: WO2009122263A1] The invention concerns a frame (1; 20) for covering elements (2; 23) of openings (A) made in buildings, interposed between the perimeter that delimits the opening (A) and the perimeter that delimits the cover (3) of said covering element (2; 23) itself. The frame comprises one or more annular edges (8) made of insulating material covering the entire inner perimetral surface (9; 25, 26) of the frame (1; 20) facing towards the inside of the building to which the covering element (2; 23) is applied.
