Abstract (en)

[origin: WO2009127203A1] The present invention relates to a strut for an intermediate turbine housing of a turbo machine, particularly a gas turbine, having a first end for disposing on an inner structure of the intermediate turbine housing, and a second end (12) opposite the first end for mounting the strut (10) on a housing (42) or an inner boundary wall of the intermediate turbine housing, where at least one flange-like element (14) having at least one first opening (18) is releaseably disposed at the second end (12) for receiving or feeding a mounting means. The invention further relates to an intermediate turbine housing for a turbo machine, particularly a gas turbine, and a method for producing an intermediate turbine housing of a turbo machine, particularly a gas turbine.
