Abstract (en)

[origin: WO2009121909A1] The invention relates to an illuminating device (40) for illuminating the region of a door opening (14) which is to be closed by a door leaf (20). In order to design the illuminating device to be easier to install, a lighting means (42) is to be attached to the door leaf (20) such that it moves therewith and by means of which the region can be directly or indirectly illuminated.
