Abstract (en)

[origin: WO2009129785A2] The invention relates to a high-current contact (3) wherein several individual, electric conductors (6) of a common electric line (7) are soldered to the contact element (5) individually or in groups. According to the invention, the contact element (5) comprises a plurality of recesses (13) into which the electric conductors (6) are introduced. The soldered connection of the high-current contact (3) can be tested in a simple manner.
