Abstract (en)

[origin: WO2005116361A1] The invention relates to a panel made of a wooden material with a surface coating, comprising an undercoat which is applied to the wooden material and at least one lacquer coating and a functional component. The aim of the invention is to produce a panel made of a wooden material with a low-cost surface coating which can be applied easily and is optically appealing. The invention also relates to a method for coating wooden materials and to a device therefor.
