Abstract (en)

[origin: EP2270407A2] The household device comprises a device inner wall (1), a recess (6), a pull out rail and a push element which is inserted in an interior container of the household device. The push element is arranged in a self closing manner. The device inner wall comprises the recess, where the pull out rail is mounted at a mounting rail. An independent claim is also included for a method for manufacturing a household device.
