Abstract (en)

[origin: EP2270766A1] The invention relates to a recording device (100) for recording data, particularly accident-related data of a person and/or a vehicle involved in an accident, said recording device (100) comprising storage means (110) for storing said data. The inventive recording device (100) is characterized by comprising receiving means (120) for receiving data, preferably identification data (ID), from at least one further device (100', 200) external to said recording device (100), and by being configured to at least temporarily store received data (ID) to said storage means (110).
