Abstract (en)  
[origin: WO2009117756A1] The invention relates to a bending tool (14), comprising a measuring element (21) and an element holder (18) for the detachable connection of the measuring element (21) to the bending tool (14), characterized in that the measuring element (21) has an information carrier (30) and that on the bending tool (14), particularly on the element holder (18), a non-contact sensor arrangement (32) is disposed for detecting at least one piece of information contained in the information carrier (30), particularly a permanent identification characteristic (31) of the measuring element (21).
