Abstract (en)

[origin: WO2009118358A1] The invention relates to an electric cut-off device for medium or high voltage that comprises a housing (10) containing electric cut-off members (30, 40, 50), characterised in that the device comprises, on at least one wall (11) thereof, at least one porthole (100) formed by a cut or made of an optically transparent material, associated with a mirror (110) located outside the housing (10) and oriented so that the electric cut-off members (30, 40, 50) inside the housing (10) can be seen through the porthole (100) from a front surface (13) of the housing.
