Abstract (en)

[origin: WO2009132736A1] The invention relates to a substrate comprising a conductive mesh of metallic conductor traces (102) deposited on the substrate, wherein the conductor traces have a first side (104), facing the substrate, and a second side (106), remote from the substrate, wherein the second side is at least partly provided with a reflective layer (110) and wherein the substrate is transmissive.
