Abstract (en)

The present invention provides a reliable integrated arrangement for cooling a compressor system. This is provided by a casing design, where said casing (2) for gas compressor (100), comprises a channel (4) to carry a cooling medium (6), said channel (4) enclosed within an inner surface (8) and an outer surface (10) of a wall (12) of the casing (2) of the gas compressor (100), wherein said channel (4) is along the direction of the wall (12). The casing (2) has at least one inlet (14), extending to said channel (4) to receive the cooling medium (6) from the gas compressor (100) and at least one outlet (16) in the casing (2), extending to said channel (4), to let the cooling medium (6) enter hot regions of the gas compressor (100) from the channel (4).
