Abstract (en)

A multi-function replaceable modular LED lamp includes a lamp base (10), a lampshade (20), a plurality of LED modules (30), a power supply control circuit board (40), and a detector (50). The lampshade is disposed on the lamp base (10). The plurality of LED modules is detachably disposed in the lamp base (10) and electrically connected to the power supply control circuit board (40). The detector (50) is detachably disposed on the lamp base (10) and electrically connected to the power supply control circuit board. The detector has a specific function, such as an earthquake detection, a human body detection, a disaster detection, an alarm detection and the like. The LED modules (30), the detector and the other parts of the present invention are replaceable with ease, which has the advantages of environmental protection and energy saving.
