Abstract (en)
[origin: EP2273323A2] The oscillator has an annular felloe (18) centered on an oscillation axis and mounted on an attachment portion (32) that is located on the axis. A fixation portion (10) is fixed to a frame along a clockwise direction. Elastic systems connect the felloe and the fixation portion, where the systems are suspended and free from the frame. The fixation portion is equipped with two elastic blades (34) that are connected by another attachment portion (36). Return bodies include other elastic blades (22) and are made of synthetic polycrystalline diamond or silicon covered with an oxide layer. The felloe is made of metallic material.
