Abstract (en)

[origin: WO2009121161A1] An article of clothing is provided comprising a torso portion including a front section defining the front surface of the torso portion. The front section includes an exterior surface and an interior surface. The exterior surface is defined at least in part by a first continuous portion of a one of a hook or a loop fabric. The one of a hook or a loop fabric is configured to releasably connect to the corresponding other one of a hook or a loop fabric of a display attachment. The first continuous portion includes a portion defined by a square-shaped perimeter and each one of the side of the square shaped perimeter has a length of at least about 4 inches. The interior surface is disposed on an opposite side of the front section relative to the exterior surface and includes a normal axis projecting inwardly towards the body of a person wearing the article of clothing when the article of clothing is being worn by the person. The ratio of the surface area of the first continuous portion of the one of a hook or loop fabric to the surface area of the front surface is at least about 0.5.
