Abstract (en)  
[origin: WO2009121816A1] The invention relates to a dishwashing machine, comprising at least one dishwasher rack that can assume at least two different height positions, a spraying device for applying washing liquor to items to be washed, the spraying device being associated with the dishwasher rack, a hydraulic system for supplying washing liquor to the spraying device and a coupling (2) with at least two openings (4, 6, 8) for providing a liquid-conducting connection (10) between the hydraulic system and the spraying device in at least two different height positions and at least two tilt positions. The invention is characterized in that one height position and at least two tilt positions are associated with at least one of the openings (4, 6, 8) for establishing the liquid-conducting connection (10).
