Abstract (en)
[origin: WO2009138701A1] The invention relates to a cosmetic and/or dermatological composition. The composition comprises, in combination, a hydrogen peroxide-based oxygen vector which releases oxygen in situ, and a desquamating agent selected from alpha-hydroxy acids, beta-hydroxy acids, the salts and esters of these acids, urea and urea derivatives, and also proteases with a keratolytic action that are active on desquamation. Use as a mask for the treatment of seborrhoeic conditions.
