Abstract (en)
[origin: WO2009135943A2] The invention relates to a housing for a sample in the form of at least one chemical and/or biological substance, wherein the housing has at least one Peltier element (4) for temperature control of the sample (5), integrated in a wall (3) of the housing (1). The invention further relates to a housing for a sample with a filler opening for filling the sample and a sealing element for sealing the filling opening, wherein a Peltier element is integrated in the sealing element for temperature control of the sample.
