Abstract (en)
[origin: WO2009127772A1] The invention relates to an arrangement and a method for braking an elevator car (1) in an elevator system without counterweight. The arrangement comprises a controllable brake (2, 2') and also a control (3, 19, 24) fitted in connection with the brake. The brake is fitted to be controlled with a releasing delay, which releasing delay is selected from a plurality of at least two different releasing delays (4, 5) on the basis of the direction of movement of the elevator car (1).
